

Northcross is Building Hospitals and Building Homes

In Tallahassee, the Northcross Foundation is making a difference by supporting employees to work as volunteers with the local Habitat for Humanity chapter to build a home for a needy family.

This home is one of several being built in areas where Northcross Healthcare is involved in capital-improvement projects, including Tallahassee's Capital Regional Medical Center.

We are spending \$1.3 billion on renovations and improvements to serve the needs of our community.

“Above all else, we are committed to the care and improvement of human life.”
